

$$A_6^{\text{ans}} = \text{Diagram 1} + \text{Diagram 2}$$

The image shows the equation $A_6^{\text{ans}} =$ followed by two diagrams separated by a plus sign. Each diagram consists of a light gray circle with a black outline and a black line passing through its center.

The first diagram, labeled $\mathcal{O}(p^4)$, has a horizontal line passing through the center. It also has two lines extending from the top-left and bottom-left points of the circle, and two lines extending from the top-right and bottom-right points of the circle.

The second diagram, labeled $\mathcal{O}(p^6)$, has a vertical line passing through the center. It also has two lines extending from the top-left and bottom-left points of the circle, and two lines extending from the top-right and bottom-right points of the circle.
